With views across all of Scarborough from every window you can entertain your friends and watch the ocean from your balcony, sheltered year round with unique glass shutters. Push back the sliding doors in the dining room to open up the whole apartment to extend onto the large balcony.

At a push of a button the television rises from its custom built cabinet and lowers when not in use so it doesn't obstruct the view. Complete with leather couches, custom art works in the entry Gallery, Sonos sound system, even the Master bed has motion sensing colour changing lights
