At the front of the house is a large carpeted front lounge and dining room, which has sliding door access to the sheltered paved patio, and is just right for entertaining. The master bedroom, which features a walk in robe and ensuite, are located on the other side of the tiled entrance. Both bathrooms, toilet and laundry have just been freshly renovated and re tiled throughout . The house also features electric roller shutters, which is perfect for security if you travel away, or even do shift work, plus the hot summer sun can also be easily blocked out.
